

2022 Future Leaders Program Fellowships

Join the Aldo Leopold Foundation as an Associate Fellow! This year long experience is designed for individuals who have recently completed their undergraduate degree. Associate Fellows specialize within one of two program areas, **Education & Communication** or **Land Stewardship**. Visit our [Future Leaders Program](#) page for more information.

A dark blue banner with the Texas A&M University logo at the top left. The text reads: "Texas A & M Job Board", "Latest Jobs in", "Department of Wildlife and Fisheries Sciences", and "jobs for aggies, wildlife jobs, fisheries jobs, afs jobs & all courses information".

A screenshot of the Aldo Leopold Nature Center website. The browser tabs show "Inbox - tricia@wildlife.org", "Mail - Ticia Fry - Outlook", "Job Opportunities - Aldo Leopold", "Google Scholar", and "Dashboard". The address bar shows "https://aldoleopoldnaturecenter.org/about-us/job-opportunities/". The website header includes the logo "ALDO LEOPOLD NATURE CENTER" with the tagline "Engage • Educate • Empower". Navigation links include "About Us", "Our Programs", "Your Event", "Get Involved", and "Contact Us". A large photo shows a group of people, mostly wearing green shirts, standing in front of a wooden building. Below the photo is the "Job Opportunities" section, which includes a statement of equal opportunity and a specific job listing for "Environmental Educator & Community Assistant (Part-time/Permanent)".

← March Mammal Madness - The 10th...

Important points from Lecture 3

- What is a paradigm, and how do they change?
- Paradigms in wildlife management
 - Pre
 - Open-access
 - Protectionism
 - Resource Management
 - Environmentalism
 - What is next?
- Important people including Gifford Pinchot and Aldo Leopold

A FEW OF ALDO LEOPOLD'S MANY CONTRIBUTIONS

Wrote the first textbook on wildlife management (“intellectual father of field”)

Applied scientific (ecological) principles to solving wildlife management challenges

Facilitated the shift in wildlife management from protectionism to ecology based

Created the first academic program to train wildlife managers in scientific principles

Promoted the concept of active intervention to conserve and restore wildlife

Supported the need for well-trained, professional wildlife managers

Evolved in his thinking!

The Land Ethic - Throwing your weight around

What else?

ERA OF ENVIRONMENTALISM

Just as protection proved inadequate, game management alone proved insufficient to address complex problems facing wildlife as such objects of management expand

1947: Defenders of Wildlife

1954: The Human Society

1964: Wilderness Act

1966-73: Endangered Species legislation – Marine Mammal Protection, CITES

1969: National Environmental Policy Act

1970: EPA formed

1970s: Non-game programs proliferate

1971: Green Peace

1980s: Biological diversity becomes focus – lots of NGOs

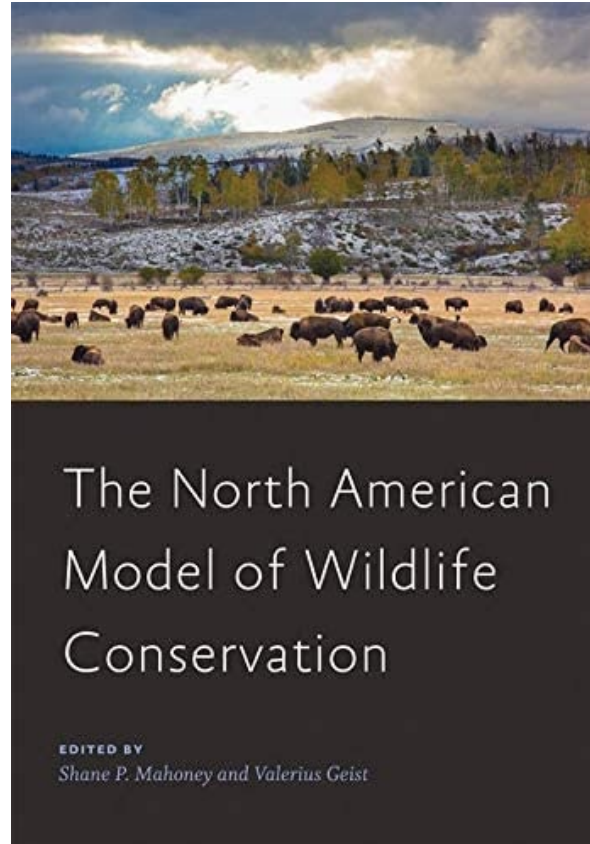

Recovering America's Wildlife Act

- Provide \$1.3 billion in dedicated funding annually for the implementation of state fish and wildlife agencies' wildlife action plans.
- Provide \$97.5 million in dedicated funding annually for tribal agencies to work on at-risk species recovery.
- Allot 10% of dedicated annual funds towards the implementation of a competitive grants program aimed at fostering regional cooperation among states.
- Leverage funds from state agencies, universities, and non-governmental organizations to boost the power of federal conservation spending.
- Provide greater regulatory certainty for industry and private partners by conserving species and avoiding the need to list them under the Endangered Species Act.
- Empower wildlife professionals to hold the nation's wildlife in the public trust for generations to come by providing state and tribal agencies with the flexibility to conserve populations in an effective and cost-effective manner.

American Game Policy (1930)

1. **Extend public ownership and management of game lands** just as far and as fast as land prices and available funds permit. Such extensions must often be for forestry, watershed and recreation, as well as for game purposes.
2. **Recognize the landowner as the custodian of public game** on all other land, **protect him from the irresponsible shooter, and compensate him for putting his land in productive condition.**
3. Experiment to determine in each state the merits and demerits of various ways of bringing the three parties [**landholder, hunter, and public**] into productive relationship with each other.
4. **Train men** for skillful game administration, management, and fact-finding. Make game a profession like forestry, agriculture, and other forms of applied biology.
5. **Find facts** on what to do on the land to make game abundant.
6. **Recognized the non-shooting protectionist** and the scientist as sharing with sportsmen and landowners the responsibility for conservation of wildlife as a whole. Insist on a joint conservation program, jointly formulated and jointly financed.
7. **Provide funds.** Insist on public funds from general taxation for all betterments serving wildlife as a whole. Let the sportsmen pay for all betterments serving game alone.

North American Model of Conservation (2001)

<https://www.youtube.com/watch?v=G4yCr0d6LnY>

Tenets of North American Model of Conservation

1. Wildlife is a public resource
2. Markets for game are eliminated
3. Allocation of wildlife by law
4. Wildlife can only be killed for a legitimate purpose.
5. Wildlife species are considered an international resource.
6. Science is the proper tool for discharge of wildlife policy. The democracy of hunting

What do you think?

To consider....

Protecting critical habitat for endangered wildlife species

Should biodiversity also be held in public trust? (Convention on Biological Diversity contains far-reaching obligations for the parties)

Reducing deer densities to control chronic wasting disease (and other control programs)

Restrictions on uses of public lands because of impacts on wildlife

Anti-hunting ballot initiatives (and Wisconsin's constitutional amendment)

Who should pay for the management of a public trust?
